充電

您購買本產品時，電池並未充滿，因此使用前請務必先充電（充滿電約需 3.5 小時）

為了延長電池使用壽命

- 超過 1 個月不使用時，請充滿電，拔掉電源供應器插頭後保存，且半年至少充電 1 次。
- 為避免影響電池壽命，使用時因電量耗盡而自動停止時，請勿嘗試再次啟動，也請勿放置不管，以免電池過度放電。
→每次使用後請務必充電
- 請在 5 °C ~ 35 °C 的室溫下充電。（為能正確充電，避免使用時間變短或充電時間變長，請勿在溫度過低處或陽光直射等高溫處充電）

備註

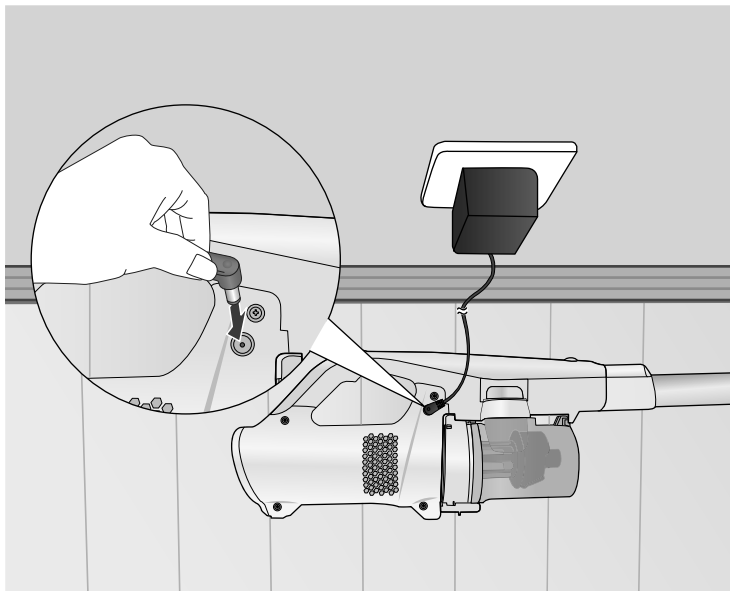

- 產品運轉狀態下若插入電源供應器進行充電時，會自動停止運轉，轉換成充電模式。
- 充電時本體、電源供應器的溫度會升高，此為正常現象，並非異常。
- 充電時間、使用時間會因電池溫度、使用狀態等而發生變化。
- 充電途中雖可取下產品使用，但使用時間會比充滿電時要短一些。

請求

- 購買後初次使用或時隔半年以上再用時，電池可能因過放電而導致電池電量減少。
→使用前請務必充電
- 電源供應器插入電源後，即使不充電也會消耗 0.5 W 的電力。
→長期不使用時，為了省電請拔掉電源插頭
- 為避免充電對電視機、電話等產生干擾（如產生雜音等），充電時請距離電視機、電話等 1 m 以上。

選擇房間角落等不易碰撞到的地方，平穩地橫放於地面上進行充電。

- 充電時電量指示燈開始明暗變化，充滿後自動熄滅。

- 如圖電源供應器端子插入本體充電接點到底
- 拔端子時，請勿拉扯電源線（以免斷線）
- 請拿著端子 L 形處拔出

清理垃圾，並進行
維護保養。

告知

- 微塵感應燈與電量指示燈同時閃爍（此時吸力減弱）時，請及時清理垃圾，並進行維護保養。
- 為了防止吸力下降，沙子等容易堵塞的垃圾，即使數量很少也請儘早清除，並對集塵盒進行維護保養。
- 對新地毯等吸塵時，由於吸入地毯脫落的絨毛，集塵盒會更快積滿。

集塵盒

2 按住按鈕，取出格狀過濾網

3 清除掉垃圾

及時：吸力減弱時

定期：每月 1 次左右

建議

- 建議每次吸塵之後就馬上清除垃圾，並進行深層的維護保養。如此既可防止垃圾產生異味，又可防止集塵盒內各部附著細微易堵的垃圾（如塵土、棉被中的棉塵等）而導致吸力減弱。

請求

- 請勿使用洗滌劑、漂白劑、稀釋劑、酒精等物。（以免造成裂痕、變色）
- 水洗後請置於通風良好的地方大約 24 小時，使其完全乾燥。（以免產生異味或造成堵塞）
- 請勿使用吹風機等熱風進行乾燥。（以免造成故障）

Notes on Use

To extend the service life

The vacuum cleaner is a household vacuum cleaner and should not be used for commercial or industrial purposes and for other purposes other than vacuum cleaning.

- Do not allow the unit to suck the following objects (This can cause malfunctions and odours)
 - Large volumes of powder (Construction waste or fire extinguisher powder)
 - Pet litter or anything with pet waste attached
 - Glass, pins, needles, toothpicks
 - Dehumidification powders
 - Water and other liquids • Damp or wet items
 - Carpet fringes • Long pieces of string
 - Objects that easily block the suction inlet (Stockings, etc.)
- Do not try to clean in places with large volumes of sand, pet litter or gravel (This can cause malfunction)
- Do not directly vacuum with the front port of the body or extension wand (So as not to wear the front port)
→ Please use floor nozzle
- Do not block the exhaust vent (This can cause deformation due to overheating)
- Do not operate for a long time if the suction inlet is blocked (To avoid deformation due to overheating)
- Do not arbitrarily fiddle with the charge plug (To avoid bad contact)
- Do not use the vacuum cleaner in extremely hot or cold environments (as the rechargeable battery in it cannot work properly)
→ It is recommended to use the vacuum cleaner in the environment of 0 °C ~ 40 °C (please charge it in 5 °C ~ 35 °C)

To prevent overheating of the motor (Protection function)

If the vacuum cleaner continues running under the following conditions, the protection function will be activated, the body or suction nozzle will automatically stop running to prevent the motor from overheating and damage. (P. EN14)

- When the dust bin is full of rubbish
- When the nozzle and suction inlet are clogged
- When the rotating brush is placed in the same place as it rotates
- When foreign objects are wound around the rotating brush

Before use

Charging

The battery is not fully charged at the time of purchase, so please be sure to charge before use
(Full charge takes about 3.5 hours)

To help make the battery last longer

- If the vacuum cleaner is not used for more than 1 month, charge it fully. Unplug the battery charger and store the cleaner. Charge it at least once in six months.
- To avoid affecting the battery life, when the vacuum cleaner stops automatically due to the exhausted battery during use, do not attempt to restart it or leave it alone to avoid over discharge.
→Make sure to charge it after use
- Recharge in a room where the temperature is between 5 °C and 35 °C. (In order to charge correctly, avoid the use time to become shorter or charge time to become longer. The unit cannot charge properly if the room is too cold, or too hot such as when the room receives direct sunlight.)

Note

- When it is plugged in for charging during operation, the vacuum cleaner will automatically stop running and change to charging mode.
- The temperature of the body and the battery charger will increase during charging, which is a normal phenomenon.
- The charging time and service time will vary depending on the temperature and status of the battery.
- Although the vacuum cleaner can be used when it is not fully charged, the service time will be shorter than when it is fully charged.

Request

- When used for the first time after purchase or left idling for more than 6 months, the battery may be reduced in capacity due to over-discharge.
→Make sure to recharge it before using it again
- After the battery charger is plugged in, 0.5 W is consumed even if the vacuum cleaner is not charged.
→When the vacuum cleaner is not in use for a long time, unplug the plug to save power
- In order to avoid interference with TV sets, telephones, etc. (such as noise), please keep more than 1 m away from these appliances when charging.

Choose a hard-to-reach place, such as a corner of a room, and lay it horizontally and steadily on the ground for charging.

- The battery level lamp will lights up as breathing lamp during charging, and will go out automatically when the battery is fully charged.

- Plug into the port of the body completely as shown.
 - Do not pull the mains lead when pulling the plug (To avoid breaking the mains lead)
→Please hold the plug and pull it out

■ How to check the remaining battery power

Flashing (blue)

Charging

The temperature of the battery changes depending on the service conditions such as ambient temperature and service time. When the battery temperature is too high, it will automatically wait until the temperature is suitable for charging, and then recharge, so the charging time will be longer. (up to about 6 hours)

OFF

Charging completed

After the charging is completed, the lamp goes out.

- Fast flashing (at an interval of approximately 0.3 second) indicates an abnormality. For details, please refer to “Troubleshooting” (P. EN14)

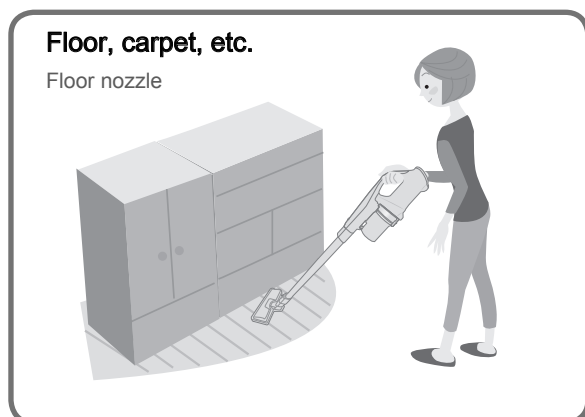

Cleaning

Request

- Gently move the floor nozzle during use. Do not press down hard. (So as not to damage the floor)
- To prevent scratches, do not use it to clean burnished surfaces, such as piano.

Choose a nozzle based on different usage

Request

- Gently move the floor nozzle during use. Do not press down hard.
(So as not to damage the floor)
- Turn off the vacuum cleaner before changing the nozzle.
- To prevent scratches, do not use it to clean burnished surfaces, such as piano.

Maintenance

- Turn off the vacuum cleaner when cleaning up rubbish or during maintenance.

When the dust bin is full or the suction power is weakened, please clean up the rubbish in time and perform maintenance.

Note

- When the dust sensor lamp and the battery level lamp flash at the same time (In this case, the suction power is weakened), please timely clean up the rubbish and perform maintenance.
- In order to prevent the suction power from dropping, rubbish that easily clogs such as sand should be removed as soon as possible even if the amount is small, and the dust bin should be maintained.
- The dust bin may become full earlier on new carpets because of the presence of loose threads.

Dust bin

1 Remove the dust bin

Press the dust bin release button to remove the dust bin (as shown)

- When opening the dust bin, please do not place it as shown in the figure, so as to prevent the garbage from leaking when the suction inlet faces downward.

2 Clean up the rubbish

- 1 Hold the handle to remove the pleat filter

- 2 Press and hold the button to remove the mesh filter

- 3 Clean up the rubbish

Face the suction inlet upwards

Timely: When suction is weakened

Regularly: approximately once a month

Recommendation

- It is advised to remove the rubbish immediately after each vacuuming and perform **detailed maintenance**. Not only will this prevent rubbish from producing odors, but also prevent the dust in the dust bin from adhering to subtle and easily-blocking rubbish (e.g., dust, dust from cotton quilts, etc.), resulting in weakened suction power.

Request

- Please do not use substances such as detergent, bleach, gasoline, thinner, or alcohol (To avoid cracks and colour change)
- Please dry the dust bin completely for about 24 hours immediately after washing (To avoid odor or clogging)
- Please do not use blow dryer or similar device to dry it (To avoid malfunction)

Detailed maintenance

Mesh filter

Pleat filter

Tap lightly to shake off the dust

You may wash the vacuum cleaner when it becomes dirty after prolonged use

Soak in water (about 30 minutes)

- After washing, please fully dry it and reinstall it

Reinstall it

1 Reinstall the mesh filter and pleat filter

2 Reinstall the body

- The dust bin will not be able to suck in garbage if it is not installed in place.
